

## Saddle Pad Measure

Do you have a dropped rigging or treeless saddle? If the answer is yes, you will need a width of 34" – 36". If the person weighs more than 300 lbs., they will need extra protection.

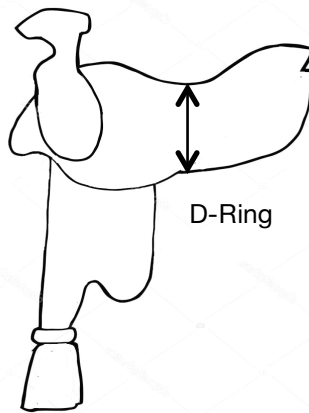

### Western Saddle

Front to Back:  
(Round or Square)

Add 3" onto measured size results.

Side to Side:  
(Round or Square)

Measure from center to bottom of D-Ring then double the result.

Make sure to do all measurements on the underside of the saddle.
